RFID Tags - From Concept to Reality to Revenue

This rugged design is perfect for metal mount applications that require a robust tag. Our puck is constructed of highly impact resistant material and is ultrasonically welded to provide maximum water and dust protection.

SMARTRAC innovates the most advanced and technically demanding RFID tag solutions for a vast array of client applications that can not be served by paper labels. These applications range from those that require off-the-shelf solutions or some modification of an existing solution, to those that demand custom prototyping to withstand the harshest environments imaginable.

MECHANICAL DIMENSIONS	1.75 x 0.625 in (45 x 16 mm)
READ RANGE & FREQUENCY SPECIFICATION	18-24 in (45 - 61 cm) UHF (902 - 928MHz, Gen 2 96Bit)
HOUSING & DESIGN	Material - UV stabilized polycarbonate, other materials available upon request Standard black - other colors available with minimum order commitment Highly impact resistant material and design
LABELING	Mold insert area for customer logo 0.875 x 0.375 in. Additional charges apply.
CLASSIFICATION	Designed to withstand IP68*. Tested to withstand water depths of 180' (54.8m) at 70°F (21.1°C)
TEMPERATURE RANGE	-40° - 257° F (-40°-125°C)
MOISTURE RESISTANCE	The tag shall be subjected to 10 continuous cycles. Steady-state temperature / humidity test shall consist of 100 hours with the test conditions of 25°C and 80% RH
MOUNTING	Bolt on Pressure sensitive adhesive available for an additional fee
ENCODING	Custom encoding optional

Performance of this product may vary depending on the customer's application and use.
